

# Omni Messenger

Omni Messenger is the **world's first GroupWise® Messenger client for Pocket PCs**. Whether **Ed** is in a boardroom in New York or at a meeting in Hong Kong, he can communicate with his colleagues in real-time.

Meet **Ed** in Finance. Ed loves numbers – and GroupWise Messenger on his Pocket PC!

## Omni Messenger Overview

Omni Messenger is the world's first "native" GroupWise Messenger client for Pocket PC and Windows Mobile™ PDAs and PDA Smartphones. Omni Messenger enables users like **Ed** to access GroupWise Messenger from anywhere – whether it be from a boardroom in London or an investors meeting in New York.

## Secure, Real-Time Collaboration

Omni Messenger delivers secure, real-time communications and collaboration. Using Secure Socket Layer (SSL) encryption\* for all client-to-server communications, Omni Messenger precludes eavesdropping whether it is over WiFi, GPRS or another wireless protocol. In addition, SSL encryption alleviates the fear of an account potentially being hi-jacked.

\*The GroupWise Messenger server must be configured for SSL. You also require a data plan from your telephone service provider.

## Protect Your Knowledge

Omni Messenger extends your managed and secured instant messaging environment to your mobile users. Providing mobile access to your GroupWise Messenger users allows you to restrict access to AOL Messenger®, MSN™ Messenger and Yahoo! Messenger™ without slowing down current business cycles. GroupWise Messenger also allows you to protect your corporate intellectual property and archive all conversations for future reference.

## "Get Mobile!"

Visit [www.omni-ts.com/groupwise-messenger/](http://www.omni-ts.com/groupwise-messenger/) to download a free trial version of Omni Messenger. Call +1 780-423-4200 or email [sales@omni-ts.com](mailto:sales@omni-ts.com) to place your order.
