

EMU (Enterprise Management Utility)

Bulk import, modify, manage and delete hundreds or thousands of GroupWise, NetMail and eDirectory user accounts with EMU (Enterprise Management Utility). Ideal for K-12 schools, universities and colleges and governments.

The Ultimate Enterprise Bulk User Import and Management Utility

EMU Overview

EMU delivers the ultimate bulk user import and mass user management application. Use EMU to bulk create, modify, manage, import or delete hundreds or thousands of eDirectory, GroupWise and NetMail accounts in a single session. EMU provides speed and consistency throughout your user creation and bulk modify processes.

Originally developed to provide an intuitive workstation application and interface for managing user accounts in school environments, EMU has developed into a fully-fledged user import and modification application. EMU eases the administrative challenges of administrators who manage large numbers of eDirectory, NetWare, GroupWise, and NetMail users.

What Makes EMU unique?

EMU is a powerful and mature application that has been enhanced over the last five years to include features and requests from large network administrators of all types. EMU has the features you are looking for whether you are looking to delete accounts that have been inactive for over X days, identify orphaned home directories that are no longer associated with user accounts, create user web directories, move user home directories to a different server, or just about any other bulk user management task you can think of.

Enterprise Management Made Easy

By using EMU to carry out bulk user account changes, network administrators from schools, school districts, colleges, universities and large enterprise networks are able to work much more efficiently and focus on offering additional and improved services to their users.
