Userful

Desktop Multiplier Overview

The Desktop Multiplier™ for Novell® Linux Desktop software allows up to 10 users to share a single Novell Linux Desktop computer – no special hardware required! Simply add standard graphics cards, monitors and USB keyboards and mice to an existing Novell Linux Desktop system and install the Desktop Multiplier.

The Desktop Multiplier is ideal for Novell Linux Desktop deployments in: classrooms, computer labs, call centres, government departments, businesses, and health care facilities – wherever you find two or more computers in close physical proximity.

Featured Highlights

- Fastest, easiest and least expensive way to deploy large numbers of full-featured Novell Linux Desktop workstations
- Dramatically lowers total cost of ownership (TCO) by eliminating up to 9 out of every 10 physical PCs
- Leverages your existing investments in Novell GroupWise, Messenger, iFolder, Novell Client for Linux and your network file servers
- Outperforms thin clients and Blades at a fraction of the cost
- Perfect for Novell Linux Desktop deployments in schools, universities, businesses, governments and health care facilities
- Cost-effective at **\$99 (80€) per seat** (Volume discounts available)
