

Create Calendar Utility Web (CCUweb) enables school districts, universities, associations, communities and other organisations to **easily publish multiple GroupWise® and Outlook® calendars to the web.**

Create HTML web calendars based on your GroupWise or Outlook accounts

CCUweb Overview

Publishing multiple GroupWise and Outlook calendars on-line – along with reminders, notes, tasks, attachments and appointments – has never been easier! Create a CCUweb project and export your GroupWise or Outlook calendar to the web in minutes.

CCUweb is ideal for government departments, law firms, corporate accounts, school districts, universities, communities, church groups and project managers. CCUweb helps organisations share calendar information, meeting agendas, minutes, assignments and other attachments on-line with internal and external stakeholders.

What Makes CCUweb Unique?

CCUweb is compatible with Novell® GroupWise, Microsoft® Outlook and all web servers and browsers. The software is intuitive and easy to use for non-technical staff. CCUweb can combine multiple calendars into a single month or list view. From the web, users can import calendar items, notes, tasks and appointments directly into GroupWise or Outlook. Stakeholders receive timely information that is only typed into GroupWise once. CCUweb's auto-update feature allows you to update your on-line calendars automatically. CCUweb will help you communicate more effectively, while maximising your IT budget and existing GroupWise and Outlook investments.

Success Stories

Learn how North Kansas City School District and Weber School District use CCUweb to publish over 50 GroupWise calendars on-line at:
